

VISHAL DIWAN

Senior Technical Product Manager — AI/Agentic Systems, FinTech

Delhi, India (Remote; GCC office access) | +91 9899773581 | vishaldiwan396@gmail.com | linkedin.com/in/vishaldiwan396 | Portfolio

SUMMARY

Senior Technical Product Manager and hands-on AI builder — specialized in LLM-powered products at fintech and B2B SaaS scale. Founding team member (#8) at SnackMagic, contributing to the company's \$0 → \$20M ARR scale in 8 months and \$15M Series A at \$100M+ valuation. Currently leading AI platform modernization and P&L strategy (£8M → £10M ARR mandate) at EPIC Investment Partners (UK fintech), reporting directly to the Managing Director.

EXPERIENCE

EPIC Investment Partners

Jul 2024 – Present

Senior Technical Product Manager (AI Platform)

Noida, India (Remote, UK HQ)

- Engineered a Human-in-the-Loop (HITL) multi-agent Claude workflow for multi-million dollar investment pitches; built a custom Model Context Protocol (MCP) server so every figure resolves to a source record and unsourced claims are held for human review. Cut token usage ~40% and slashed profile creation from 12 hours to 1.5 hours.
- Benchmarked 6 LLMs against a 50-document golden extraction dataset (100+ fields/document, 5,000+ field-level comparisons) to select the production extraction model, scoring accuracy against ops-team manual extractions.
- Built a hybrid rule-based + retrieval-augmented (RAG) NAV reconciliation engine (Pinecone vector search + LLM investigation agent) across four data feeds; 90% of mismatches clear without human intervention, 70% of escalated cases pass clean on first review. Cut reconciliation cycle time from 4 hours to 30 minutes.
- Productized a GenAI-powered KIIDs/PRIIPs compliance-document generator (GPT-4, structured prompt templates) for UCITS fund compliance; cut manual drafting time 70% (2 hours → 30 minutes/doc) with a consistent regulatory review pass rate across 50+ fund documents.
- Attempted an AI-driven payroll enquiry resolution system; killed it after eval pass rate capped at 53% against a 70% threshold on unstructured input data, and shipped a rule-based, human-in-the-loop tracker instead.
- First and only PM in EPIC's history; leads a 12-person cross-functional tech squad and 2 direct reports, drives the firm's AI governance and best-practices function, took a third-party SOC 2 & GDPR security review to completion, and owns P&L strategy for a £8M → £10M ARR mandate (in progress) on a 1,000+ customer SaaS platform.

SnackMagic / Stadium

Feb 2020 – Jun 2024

Product Manager, Growth & New Revenue (previously Associate PM & QA Lead)

Delhi, India (Remote, US HQ)

- Built a collaborative-filtering AI recommendation engine from scratch in 12 weeks for personalized upselling; drove a 22% AOV lift (\$45 → \$55) and \$300K incremental monthly revenue, validated via an 8-week A/B test (15K users/cohort, 95% confidence).
- Conceived and launched white-labeled, self-service enterprise snack stores (0-to-1); drove \$600K incremental monthly revenue within 6 months with 30% adoption among top-tier accounts, from 25+ customer discovery interviews to owning GTM and pricing.
- Conceived and launched a self-service swag configurator and bulk-ordering portal (3,000+ SKU catalog, live logo mockup-and-preview, warehouse intake flow); owned vision through delivery, product transitioned to BAU.
- Owned roadmap and delivery of Swag Locker, a B2C-style virtual inventory letting recipients store, manage, and redeem corporate gifts on demand; drove a 20% lift in engagement and a \$300K+ monthly revenue stream.
- Led checkout architecture redesign: migrated session state MySQL → Redis, consolidated 7 API calls to 2; cut p95 latency 3.5s → 1.1s and lifted cart-to-order conversion 48% → 65%.

SKILLS

Product & Strategy: P&L Ownership, 0-to-1 Product Launches, GTM Strategy, B2B SaaS, A/B Testing, OKRs, Executive Stakeholder Management

AI/ML: LLMs (OpenAI GPT, Anthropic Claude, Gemini), Multi-Agent Architecture, HITL, RAG Pipelines, Prompt Engineering, Vector Search & Embeddings, Predictive AI (TimesFM)

Domain: KYC/AML Automation, NAV Reconciliation, UCITS/PRIIPs Compliance, Fund Operations, Legal Tech

Technical Stack: Node.js Microservices, REST/GraphQL APIs, SQL, GCP, AWS, CI/CD, Pinecone, Elasticsearch

EDUCATION

IIM Kozhikode

Weekend format, Dec 2025 – Dec 2027

Executive MBA (Strategic AI Management & Product Innovation)

Jaypee Institute of Information Technology (JIIT)

2016 – 2020

Bachelor of Technology, Electronics & Communication

Noida, India

CERTIFICATIONS

Certified Scrum Product Owner (CSPO, Scrum Alliance) | Google Project Management: Professional Certificate
